## Work Experience

**Primary Portal**  
*Full Stack Engineer*

**London, England**  
*July 2022 - Present*

- Creating the infrastructure, connecting banks and institutional investors for capital markets issuance
- Modifying legacy code to sync with business requirements.
- Working with AWS Amplify / Cognito for fast and secure User Auth for CRUD.
- Creating pages from scratch ( FE + BE )
- Reviewing the code of the other developers in the team.
- Developing backend using Nest.js | Node.js | Terraform | DynamoDB | AWS SQS, SNS, SES, and Lambda.
- Refactor fixtures creation pipeline to generate authentic data from CSV files.
- Languages: JavaScript, TypeScript, SQL.
- Technologies: React.js, Node.js, NestJS, Terraform, Jest, Testing Library, Cypress, Serverless, DynamoDB, GitLab.
- Googling
- Doing some exciting stuff.

**Temi Cloud**  
*Full Stack Engineer*

**Tbilisi, Georgia**  
*February 2021 - June 2022*

- Working on the no-code tool for a community-based marketing platform (Jobs, Courses, Events, Content).
  - Maintaining a React | TypeScript based component library from fully custom Figma designs (90 core components, 300+ unique components, 60K+ lines of code).
  - Privately create custom Tree data structure, write recursive functions for different kinds of manipulations, fully covered with unit tests.
  - Privately refactor Storybook pipeline, add more than 200 missing stories to document all components.
  - Add Social Authentication(Google, Facebook) pipeline to the platform.
  - Create course and event pipeline in Business and Community Managers, Admin and Platform.
  - Refactor state management system, use a custom hook for passing states and memoized functions.
  - Reviewing code of the other developers in the team.
  - Developing an event-driven backend using Nest.js | Node.js.
  - Maintain and create new unit tests for every endpoint and function using Jest(more than 350 unit tests).
  - Collaborating with Product Owner and Scrum Muster on a daily basis.
  - Languages: JavaScript, TypeScript, SQL.
  - Technologies: React.js, Node.js, NestJS, Next.js, PostgreSQL, TypeOrm, Jest, Docker, Git | Github.
  - Stats: 110 merged pull requests, 1912 commits, 115079 line additions and 41361 deletions in our monorepo in the 8 months.
-

## Education

**Tbilisi State University**

*Bachelor in Computer Science GPA: 3.83*

**Tbilisi, Georgia**

*2018 - 2022*

**Georgian Technical University**

*Master in Informatics*

**Tbilisi, Georgia**

*2022 - 2024*

---

## Skills

**Languages:** Georgia, English B2, Russian.

**Tech Stack:** JavaScript, TypeScript, React, Node.js, NestJS, Next.js, SQL.
